

DARPAN PATEL

Ottawa, Canada | [LinkedIn](#)

PROFESSIONAL SUMMARY

Backend engineer with 6+ years of experience building efficient, maintainable systems that help teams ship features with confidence. Expertise in Java, Spring Boot, and distributed systems including Kafka and message queues. Proven track record of improving system performance, implementing resilience patterns, and delivering scalable cloud-based solutions.

TECHNICAL SKILLS

Languages: Java (8, 17), SQL, Python

Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate, JUnit, Mockito, Cucumber, Resilience4j

Databases & Messaging: PostgreSQL, MySQL, Kafka, ActiveMQ

Tools & Platforms: Maven, Git, Jenkins, GitHub Actions, Docker, Grafana, Linux

PROFESSIONAL EXPERIENCE

Software Engineer 2

8x8 Inc., Ottawa, Canada | July 2025 – Present

- Continue leading development and optimization of enterprise audit and compliance services

Software Engineer 1

8x8 Inc., Ottawa, Canada | July 2022 – June 2025

- Architected and maintained Audit Service processing 1,000 RPS, tracking entity changes and user activity for compliance across all 8x8 services
- Improved GET endpoint performance by 3x+ by migrating from MySQL to PostgreSQL with monthly table partitioning
- Migrated messaging infrastructure from ActiveMQ to Kafka, significantly improving throughput for audit event creation
- Designed fault-tolerant system with database fallback for Kafka outages, preventing audit data loss; recovered lost events during production incident by reprocessing from logs
- Implemented scroll-based pagination for large data exports, eliminating expensive COUNT queries on public endpoints
- Integrated Resilience4j circuit breakers for external API calls, improving system reliability
- Created Grafana dashboards and alerts for metrics, logs, and traces across 7 team-owned services
- Standardized audit event formats and documented specifications in Confluence for cross-team consistency
- Created engineering design documents and presented technical solutions to stakeholders
- Maintained comprehensive unit and integration test coverage; contributed to Cucumber automation test suite

Associate Software Engineer

Fuze (acquired by 8x8), Ottawa, Canada | May 2021 – June 2022

- Developed and maintained Java-based back office APIs for enterprise communication platform
- Performed root cause analysis on production issues, implemented fixes with unit tests
- Optimized REST endpoint performance by analyzing and refactoring MySQL queries
- Actively participated in code reviews and added automation tests for new features

Software Quality Assurance Analyst

Proposify Inc., Halifax, Canada | August 2020 – May 2021

- Led bug triage process, created test cases and test plans using TM4J in JIRA
- Collaborated across Product, Customer Support, and Development teams in Agile Scrum environment

Software Developer Intern

ITS Planners and Engineers (ITSPE), Hyderabad, India | January 2018 – July 2018

- Built Red Light Violation Detection System for Kakinada Smart City initiative

- Developed UI for camera configuration and invoice generation; created backend scripts using FFmpeg to extract violation evidence from video streams
- Served as client liaison: gathered requirements, led demonstrations, and deployed applications to cloud servers
- **Technologies:** Java, Servlets, PostgreSQL, Log4J, JUnit, JavaScript, Git, FFmpeg

EDUCATION

Master of Applied Computer Science

Dalhousie University, Halifax, Canada | 2019 – 2020

Bachelor of Technology in Information Technology

Nirma University, Ahmedabad, India | 2014 – 2018
